custom-made **SCREENS**

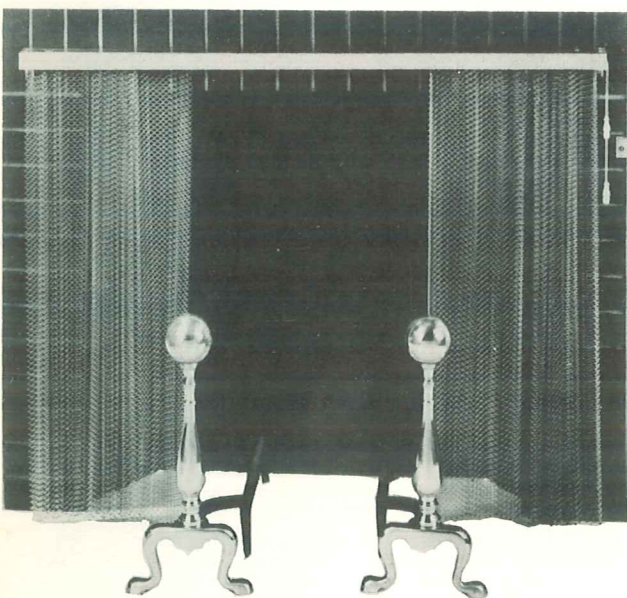

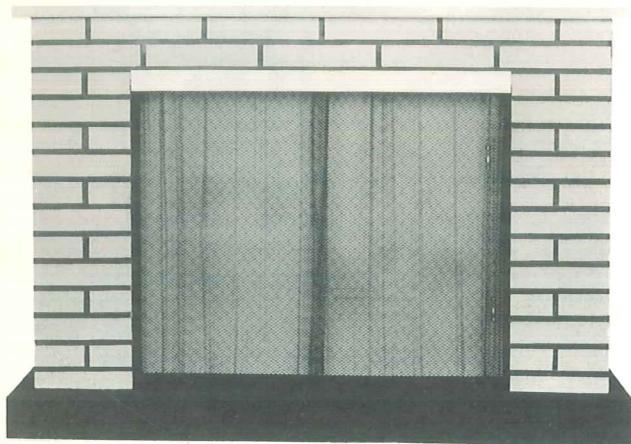

CUSTOM MADE SCREENS, HANGING TYPE

There is no trick to install a custom-made pull chain draw curtain screen, regardless of the size of your fireplace. Just take the exact measurements of the fireplace opening from inside top to inside bottom, and from inside left to inside right (preferably with a steel tape measure). We will make the screen to fit with either an inside flush mount or outside the opening, whichever is specified. IT IS MOST IMPORTANT FOR US TO KNOW WHICH TYPE IS DESIRED. If the flush mount is desired, we will make the screen exactly the size as given, and the screen when installed, will fit just inside the fireplace opening with the brass hood flush with the outside wall.

If the outside mount is preferred, we will make the screen 1" higher and 4" wider than the size as given and the screen hood will then be outside the fireplace opening. No drilling or fussing is necessary. Your custom-made screen, either flush or outside mount, comes completely assembled and ready to install in your fireplace. This mounting is made simple and easy by aid of our patented mounting bar which secures to the inside wall of the fireplace without bolts or drilling. All units when shipped have detailed diagramed instructions to aid the customer in this simple installation.

CUSTOM MADE SCREENS, STANDING TYPE

Take measurements the same as listed above. Custom-made standing curtain screens are available in styles Nos. 2317, 2318, 2319. All standing type custom-made screens will be made 1" higher and 2" wider than the measurements as given. This will give the customer a screen that frames the fireplace opening with a one inch border all around.

Our lines of solid brass planters are rust proof, soil resistant and seam locked to prevent leakage. All are sturdily constructed and well lacquered to prevent any tarnishing. Our line of planters encompass sizes from 3 inches round to 36 inches long, and are available in a full array of designs and styles in traditional and modern.

Planting suggestion to pass on to your customer.

When our planters are used the customer can be assured of a maximum of quality. However brass is an oxidizing metal and to assure the plant of maximum life we suggest that a layer of aluminum foil be placed in the planter before the soil is put in. In this way the customer can be assured of a maximum life for the plant.

Our line of candlesticks, all of solid forged brass, encompasses sizes from 3 inches tall to 5 feet tall. Over the years we have weeded out slow selling numbers until at last we feel we offer a line of candlesticks without endless duplication, each distinctive and known to be popular. The styles range from Williamsburg to Grecian period. All candlesticks are well lacquered to prevent tarnishing. Our line of candelabra and wall sconces have been chosen with equal care and discrimination. See the price list for complete data and sizes.
